

NORTHSTAR ROBOTICS

Warehouse autonomy that pays for itself in two shifts.

The floor still runs on radios and overtime.

A mid-market 3PL spends 38% of warehouse opex on walking and rework.

Existing AMRs force a full layout redesign. Northstar drops onto the existing floor.

Pilot sites recover the hardware cost inside 11 weeks.

Traction

\$4.2M ARR

up 3.1x year over year, 14 paid sites, NRR 118%.

Logo retention 97%. Average contract 26 months.

Numbers on this slide are the ones we take to IC.

Team

40 people

across robotics, field ops, and a 9-person deployments bench.

Founders from CMU NREC and Amazon Robotics.

Use of proceeds

18 months of runway

at the current plan, after a \$22M Series A.

Hire field techs, finish the second-shift stack, open Dallas.

The raise

Raising \$22M · Founders 15%

Founders retain 15% after the round on the cap table we walk.

Employee pool 12%. No secondary.

Market

\$48B TAM

US and EU mid-market 3PL autonomy, 2026.

We take 4% in five years. SAM \$6.1B. SOM \$240M.

Appendix

Data room includes the operating model, cap table, and KPI one-pager.
